PROFILE

As a Front-End Developer with 1.5 years of experience, I specialize in building modern and responsive web applications that focus on user experience and performance. My expertise lies in developing interactive user interfaces, optimizing components, and implementing clean and maintainable code using React and modern JavaScript frameworks.

TECHNICAL SKILLS:

- HTML, CSS, SASS
- Javascript, Typescript, React.js, Next.js,
- Tanstack Query, Redux, MobX
- React-hook-form, Formik
- Styled Components, Tailwind CSS, MUI, AntD
- REST, WebSockets
- SEO
- next-intl, react-i18next

WORK EXPERIENCE

GLOBAL PARTNER SOFT - FROTEND DEVELOPER

MARCH 2023 - now

Projects:

Wippli

SEPTEMBER 2023 - MAY 2024

FEBRAURY 2024 - Now

Developed Wippli, a smart workflow platform that streamlines remote collaboration between clients, suppliers, and teams. Designed and implemented a centralized system to gather and convert client requests into actionable tasks, improving project visibility and efficiency. Created a user-friendly interface for consistent and branded communication, enhancing client interactions. Focused on simplifying processes, enabling truly remote work, and fostering clear communication across global teams. Contributed to Wippli's growth to over 20 worldwide collaborators and successfully integrated multiple technologies to build a scalable product that boosts productivity, engagement, and user satisfaction.

It includes an admin panel, a marketplace, and a core platform for task management, communication, and file sharing. I was involved in developing new features, improving the UX/UI, optimizing performance, and improving business logic.

Stack: React, Next.js, Mui, tailwind, react-hook-form, tanstack query

WORK EXPERIENCE

Study UA
JUNE 2024 - FEBRUARY 2024

At Study UA, an international educational company with offices in Ukraine, Cyprus, and other locations, I contribute to the development and maintenance of digital solutions that enhance the company's online presence and streamline user interactions. My responsibilities include implementing responsive user interfaces, optimizing web components for performance, and ensuring cross-browser compatibility using modern front-end technologies such as React, TypeScript, and MUI.
I collaborate closely with designers and backend developers to deliver intuitive and engaging experiences for our users, including students and educational advisors.

I participated in the development of Study.ua from scratch, creating both the client and administrative parts. My work included developing key features, optimizing performance, and improving user experience.

Stack: React, Mobx, Formik, Mui,

Estet
MARCH 2023 - JULY 2023

Developed a comprehensive online platform consisting of four specialized sections within the beauty industry. The project primarily serves as an educational and professional news portal, providing a centralized hub for industry professionals, beauty enthusiasts, and educational institutions.
I was responsible for building and optimizing user interfaces for all sections of the platform, ensuring a seamless and engaging user experience across different devices. Collaborating closely with designers and backend developers, I implemented dynamic features that include interactive content modules, real-time news updates, and educational resources. I also focused on improving the website's accessibility, performance, and responsiveness using modern front-end technologies like React, TypeScript, and Antd.
