SUMMARY

Frontend Developer with 3+ years of experience building high-performance web applications using React, Next.js, and TypeScript, including contributing to Expensify's frontend products. Specialized in scalable UI architecture, performance optimization, and maintainable, user-focused interfaces.

WORK EXPERIENCE

Wippli

Remote, September 2023 - November 2025

Junior/Middle frontend developer

- Developed and enhanced core front-end components of Wippli's smart collaboration platform, increasing overall usability by 22% and enabling smoother project tracking and task visibility across 20+ distributed teams.
- Refactored the UI architecture and design system using modern frameworks (Next.js), reducing interface load time by 18% and boosting client satisfaction through more consistent and intuitive user experiences.
- Refined and optimized frontend modules in React/TypeScript for admin, marketplace, and core applications, boosting system performance and enabling global scale-up.

Study UA

Remote, June 2024 - February 2025

Middle frontend developer

- Built the platform from the ground up - including both client and admin portals - delivering a full production-ready MVP within 2 months and enabling scalable digital operations across multiple international offices.
- Engineered reusable front-end components for both admin dashboard and client application within a single codebase, using React, TypeScript, MUI, and MobX, improving maintainability and accelerating feature delivery.
- Implemented an intuitive admin dashboard for internal teams, designing user-friendly interfaces and interactive components that reduced manual data entry and processing by 15%, while streamlining student tracking, enrollment management, and reporting across multiple departments.

PROBHUB - Estet

Remote, February 2023 - July 2023

Junior Frontend developer

- Developed a multi-section beauty industry platform from concept to deployment, delivering four fully functional modules and enhancing platform engagement by 45% through cohesive UI architecture and responsive design.
- Built and optimized SEO-focused AMP pages, improving page indexing speed by and boosting organic traffic visibility, ensuring lightweight, mobile-friendly layouts fully compliant with search engine performance standards.
- Implemented server-side rendering (SSR) and incremental static regeneration (ISR) for content delivery, enhancing data fetching efficiency and overall performance by 35%, which resulted in faster initial load times and improved SEO ranking.

SKILLS

Next.js, React, Typescript, MobX, TanStack Query, Material UI, Tailwind, CSS, HTML, Internationalization

EDUCATION

Khmelnytskyi National University - Bachelor's in Computer Engineering

Contributing

Expensify - Open source

June 2025 - Now

- Contributed over 50 merged PRs to improve front-end features, enhance user experience, and resolve production issues.
- Produced clean, maintainable code in TypeScript/(React Native), following Expensify's contribution guidelines and best practices for consistency.
